

ABSTRACT OF THE DISCLOSURE

An all terrain vehicle ("ATV") with a frame and only four wheels suspended from the frame is disclosed. Two of the wheels are front wheels and two of the wheels are rear wheels. The front wheels define a front axis and the rear wheels define a rear axis. The front axis and the rear axis define a wheelbase of greater than 51 inches, and each wheel includes an ATV-type tire. The ATV has two shock absorbers connected to the frame. The shock absorbers are associated with the rear wheels. A power unit for driving at least one of the wheels is disposed on the frame. The ATV also has a straddle-type seat disposed on the frame, and handlebars for steering at least one of the wheels disposed on the frame.
